MEMORANDUM

SUBJECT: Extent of closure activities at the Woodward Industries site (Superfund-TXD026868323) A.K.A. East Texas Wood Treating Co. (RCRA-TXD000719757)

FROM: Robert L. Deese, Acting Chief  
Superfund Site Assessment Section (6H-ES)

TO: Guanita Reiter, Chief  
Oversight Section (6H-HO)

A site inspection of the Woodward Industries site which was conducted by Engineering Science, a contractor for the TWC superfund unit, indicated that closure activities are being initiated at this inactive wood treating facility.

At one time, this facility was listed as a T.S.D. facility; however, it is unknown whether the closure activities at this site are undergoing RCRA oversight, and it is also unknown whether this facility ever filed for bankruptcy. Any information which would clarify the current RCRA status and would provide more detailed information on any remedial action undertaken by the TWC-RCRA would be greatly appreciated. If you have any questions regarding this request, please feel free to call David Gonzalez of my staff at 5-6740. Thank you.

bcc: David Gonzalez (6H-ES) D.G. 06/24/87.
